

SHERZOD ORZIKULOV

Backend developer

About Me

I have been passionate about programming for many years. Initially, I taught myself frontend development using social media platforms, gaining skills in JavaScript. After transferring my studies to Uzbekistan, I started learning backend web development at the Ustudy educational centre, established under Uzinfocom. Currently, I am completing this course while simultaneously pursuing an artificial intelligence course at the same centre.

- Django
- Telegram Bot
- SQL/GIT/GITHUB
- TILDA/CANVA/FIGMA
- Problem-Solving
- Time Management
- Presentation Skills
- Networking
- Market Research
- Team Collaboration

Language

- English (Intermediate)
- Russian (Elementary)

Education

(2024 - present)

TASHKENT UNIVERSITY OF HUMANITIES

Bachelor of Information Security

(2021 -2023)

ALTAI STATE UNIVERSITY

Bachelor of Information Security

(2024 -2025)

USTUDY ACADEMY POWERED BY UZINFOCOM

Backend Artificial Intelligence

- I am capable of backend development using Python, Django, and FastAPI to process data and create reliable and efficient applications. With the help of Machine Learning and Computer Vision algorithms, I can develop various types of artificial intelligence and integrate them into different professions, God willing!

(January to June 2024)

CAMELOT LEARNING CENTER

I worked on improving my English by attending additional speaking clubs.
